Tom's Python Roulette V3.2

INDEX

About

Tom's Python Roulette V3.2

Python Roulette V3.2 is a powerful Python script designed for playing on the BetVoyager.com No Zero Roulette table (Flash Version). Whether in demo or real mode, this versatile script utilizes mouse interactions to place bets on the table, offering users an interactive and automated experience.

Python Roulette V3.2 was written using python programming language.
As Python is fairly easy to learn, plus it has many cool features.
This New Version of my script was aided with the help of ChatGPT.
Asked ChatGPT lots and lots of questions.
And it provided me with much of the python code.
The script or bot took hours of writing and testing before it got to its current version.
I put in a lot of effort into getting the python code to do what I wanted it to do.
And that is, to make a bot that will bet on the roulette table. With multiple bets.
I may not be an expert on python and not that great at math.
However, with ChatGPT it helped me write the code.
I have tried to make the bot as simple and user friendly as possible.
With lots of features.
I hope you enjoy using it.

Yours…
Thomas Grant

Instructions

Step 1:
Sign up for a FREE BetVoyager Casino Account.
Be nice if you could use my referral link.
https://betvoyager.com/equal-odds/?p=E4AO05&lid=17

**Step 2:** You will need to download and install the Flash Browser.
https://betvoyager.com/casino/how-to-run-flash-games/

https://flash.pm/browser/

https://github.com/radubirsan/FlashBrowser/releases/tag/v0.81
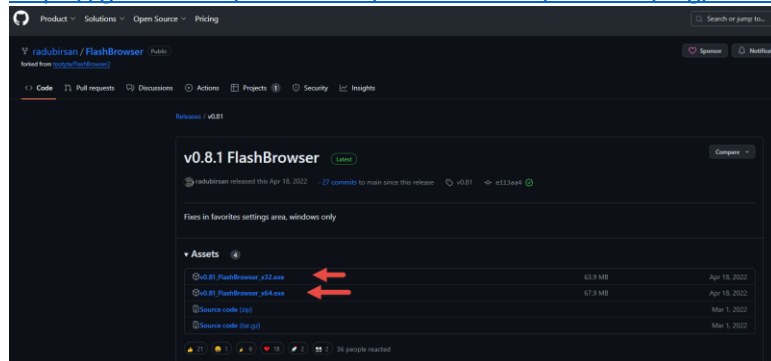

Download

You can download the Zip file from google drive.
You don **NOT** need to know or install python for the exe to load and work.
https://drive.google.com/file/d/1HvZIWvCiVbhb0ZJEvxE7sAfXIdbZPa3f/view?usp=sharing
Simply unzip the file onto your desktop.
And then run the .exe file.

For those wishing to see the python code.
There are many videos on how to install python on youtube.

How to Install Python 3.12.1 on Windows 10 [2024 Update] Complete Guide
https://youtu.be/DDFykWBb4Lo?si=nNA6BpyqUphdqkX9

You can download it from GitHub.
https://github.com/thomasrgrant/python-roulette
I wrote this code in Notepad ++ and Sublime Editor.

How it works

When you first run the script, it creates a few folders to store data in.
The script also uses .png pictures to find and compare the images on the screen.

On the first window, you can choose between RNG or No Zero Roulette.

RNG mode.
Click on the RNG button.
This will run the RNG numbers on the current default settings.

About (About Me)

Spins
How many spins you want the RNG or BetVoyager to spin for.

Balance
This is where you can put in your current balance.
(Please NOTE: The balance during the game DOES NOT WORK)

Save Data
You can tick this box to save the data to the data folder.

Save Spins
You can tick this box to save the spins to the data folder.
(The Save Spins is for future testing and implantation.)

Save
This will save the settings to the data folder.

Load
This can load any settings that you have saved.

About (About Me)

This is where you can contact me.

And ask me questions about the bot.

BetYoyager Bet Settings

These are the default settings to play on the BetVoyager No Zero roulette table.

(Use these settings in Demo mode ONLY) As that way you can see how the script/bot works.

You can turn on or of any bets that you wish.

Change the settings.

Save and **Load** settings for BetVoyager
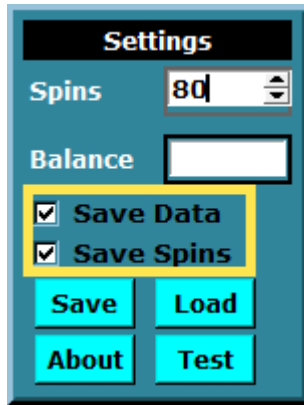

Or **Load Settings from Data**.

These are the settings that I am using and testing.

Stats

Make sure that the Save Data is ticked.

RNG or Play

As this will save the data to the folder.

The data is used in stats.

Stats1

Tom's BetVoyager No ZERO Roulette Bot GUI BV-Flash-V3.2Stats Window 1, Even Chances, Columns & Dozens, Lines, Corn...

Stats for Even Chances, Column & Dozen, Lines, Corners and Streets — Load Data

Even Chances: 1 to 1

Red	7	Black	7	Odd	8	Even	8	Low	5	High	5	EC Av	

Column & Dozen: 2 to 1

Dozen 1	11	Dozen 2	11	Dozen 3	13	Column 1	8	Column 2	10	Column 3	5	DC Av	

Lines: 5 to 1

Line 1	13	Line 2	16	Line 3	29	Line 4	15	Line 5	16	Line 6	16
Line 7	14	Line 8	15	Line 9	23	Line 10	16	Line 11	13	Line Av	

Corners: 8 to 1

Corner 1	24	Corner 2	15	Corner 3	29	Corner 4	27	Corner 5	29	Corner 6	47
Corner 7	40	Corner 8	20	Corner 9	26	Corner 10	16	Corner 11	41	Corner 12	16
Corner 13	24	Corner 14	25	Corner 15	16	Corner 16	25	Corner 17	23	Corner 18	34
Corner 19	35	Corner 20	16	Corner 21	20	Corner 22	16	Corner Av			

Streets: 11 to 1

Street_1	22	Street_2	24	Street_3	34	Street_4	42	Street_5	25	Street_6	16	
Street_7	36	Street_8	16	Street_9	29	Street_10	28	Street_11	31	Street_12	15	Street Av

The Stats show the Max amount of times something has not turned up during the spins.
In the example above, I used 80 spins.

Stats2

This has the similar data from the spins.

Stats3 Stats4

These two are place holders for more coding.

And more options on what bets to place.

Not done yet.

Images

These are the images of the numbers that turn up in BetVoyager Flash No Zero Roulette Table.
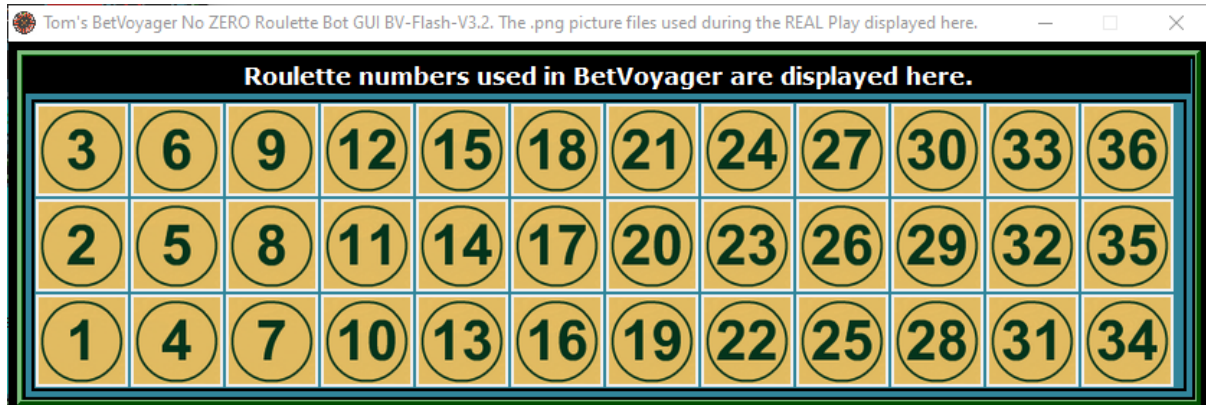

There are other images that the script/bot uses.

You can find them in the images folder.

# Playing on BetVoyager No Zero Roulette Table

Play

When you press play, it does a few things…

NOTE: You can do all this manually if you wish.

1. If the Flashbrowser is NOT open, it Opens and runs it.
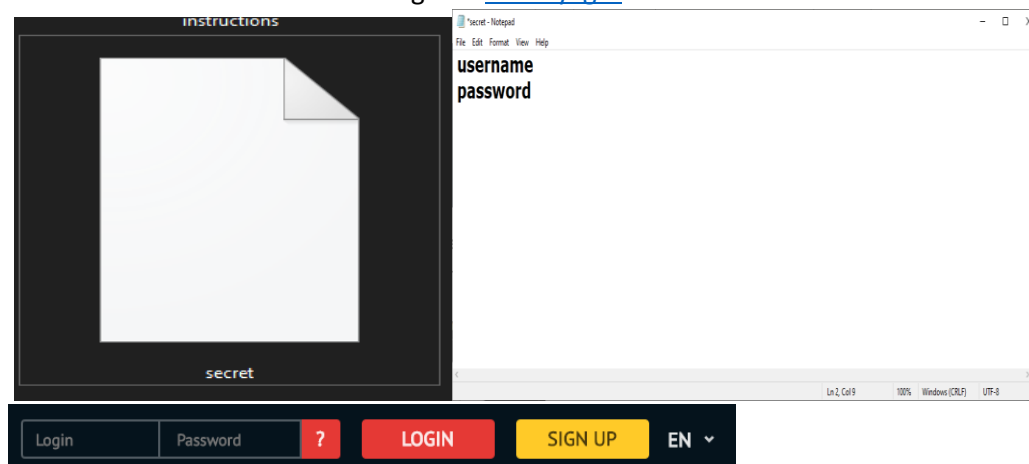

(Please read the Problems section if this does not work)

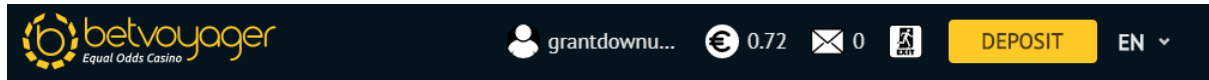

2. It goes to the BetVoyager website.

3. You will need to change the details in the secret file. Open the secret file with NotePad

Just type in your username and password and save the file.

As this secret file info is used to login to BetVoyager

In this picture you can see that I have logged into the casino.

Now to open the No Zero Roulette Table.

Make sure to play in DEMO mode first.
To see if the script/bot works.

This is what the Flash No Zero Roulette Table looks like in full screen mode.

This is the Free Spin bet it places on the table.

The Free Spin Bet is Required for it to continue to spin.

As BetVoyager has a limit of times that you can do a free spin without any bets on the table.
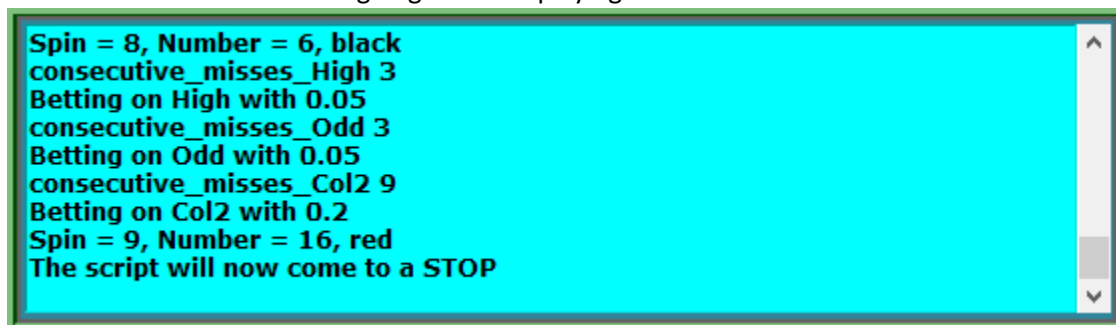

The Free Spin Bet is used any time there are NO bets on the table.

The script/bot grabs the numbers and uses them as it plays.

(Check out the Images it uses to match the image on the screen)

This is the readout of what is going on while playing.

```
Spin = 8, Number = 6, black
consecutive_misses_High 3
Betting on High with 0.05
consecutive_misses_Odd 3
Betting on Odd with 0.05
consecutive_misses_Col2 9
Betting on Col2 with 0.2
Spin = 9, Number = 16, red
The script will now come to a STOP
```

Videos

Tom's BetVoyager No ZERO (no flash) Roulette Bot GUI V2.3 made in Python
https://youtu.be/a5GHIRte8mk?si=0YBGYX0cDhp57yit

Problems

1. Not sure if the script/bot will work on a Mac.
2. You may have issues with the screen resolution.
3. There may be an issue with the Image recognition.
4. There may be an issue with the coords.
(You can modify the coords in these files.)
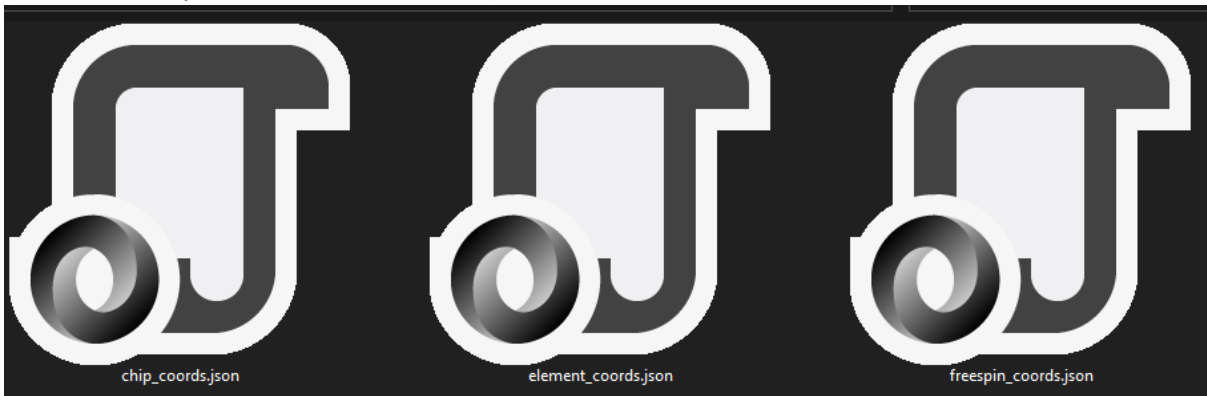

Recommend using MPos to get the coords of where things are.

MPos gets the Mouse pointer position.
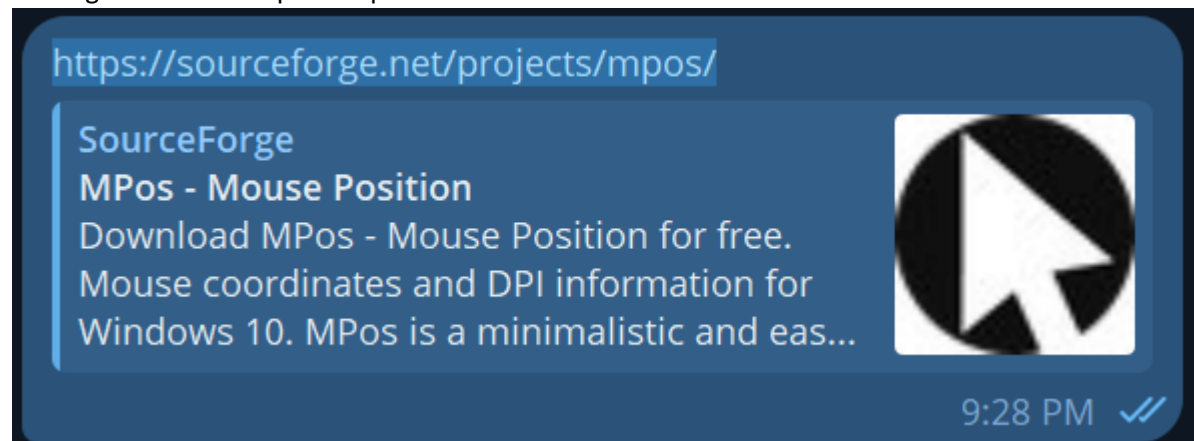

Hints and Tips

Recommend contacting me if you are having any issues.

Play in DEMO mode until you have a better understanding of how the script/bot works.

Adjust the settings.

Save your settings often.

ONLY PLAY IN REAL MODE WITH MONEY YOU CAN AFFORD TO LOSE.

Aim for short games. Press the STOP button anytime you are in profit.
